ASEA®

RENUAdvanced® Skin Care System recommended usage order

With ASEA, your journey to your best self and healthy skin is a simple process. We want to help you understand how to use our full line-up of products and the order of steps to maximize the benefits.

Your skin naturally moves through a cycle of renewal and rejuvenation, but over time this process can slow. The four-step RENUAdvanced® Skin Care System has been specifically formulated with select ingredients to support your skin's redox balance with a fresh, toned, and more youthful appearance.

Depending on your personal preference, you can integrate ASEA's other skin care products that contain our breakthrough redox signaling technology—Redox Clay Mask, RENU28® Revitalizing Redox Gel, and/or Intensive Redox Serum—to further support overall skin health and skin surface cell renewal.

Step 1 Cleanse
RENUAdvanced® Foaming Cleanser

If desired, refine and rejuvenate with
- Redox Clay Mask*
- RENU28 Revitalizing Redox Gel® **

Step 2 Tone
RENUAdvanced® Balancing Toner

Step 3 Glow
RENUAdvanced® Glow Serum

If desired, intensify with
- Intensive Redox Serum

Step 4 Hydrate
RENUAdvanced® Hydrating Cream

*Using RENU28 Revitalizing Redox Gel immediately following the Redox Clay Mask will synergistically help to enhance absorption of redox signaling molecules.

**When using RENU28 before the RENUAdvanced Balancing Toner, be sure to allow RENU28 to dry fully. Once it has, the redox signaling molecules have been absorbed by the skin surface, the molecules are creating the desired cascading effect, and you can move on to the next step and apply the Balancing Toner.

We power potential™
